Simply convincing

We believe that an umbrella has to satisfy the demands on functionality, safety and quality to be able to be effective as a long-lasting promotional item. Let yourself be convinced by the solid arguments in favour of a quality umbrella from FARE.

A trustworthy argument:

Many FARE® products are carefully tested.

LABTECH Prüfungsgesellschaft mbH is an independent laboratory accredited by DAkkS, specializing in chemical and physical textile testing and consumer goods. It conducts a full-scale usability test for specific umbrella models. This involves simulating professional use to verify and ensure functionality. In addition, particular attention is paid to the presence of potential weak points that are known to the market, and components are tested for chemical safety. The LABTECH test seal is only awarded to products that are truly flawless. The test seal guarantees the consumer a first-class product that stands out from the crowd. You can find out more about the LABTECH tests at www.labtech-gmbh.de/gebrauchstauglichkeit.html.

Products with a test seal are highlighted with the keyword (1311)110 in the product overview. Details on the certified properties can be found in

A watertight argument:

Many FARE® umbrellas are equipped with a high-quality finish.

An even better pearl-off effect or dirt-repellent properties are achieved with complex refinements, depending on the model:

- Teflon™ fabric protector is a coating that is water and dirt repellent.
- · Nanotechnology gives the umbrella cover a minutely rough structure which prevents dirt and water from sticking to the fabric and they simply pearl right off - this is the so-called lotus effect. This coating is absolutely sealed and promotes a particularly long-lasting product life.

A windproof argument:

FARE® umbrellas are strong.

Even our less expensive models excel in their high standards of quality and special windproof features for better wind resistance. The majority of FARE® models are equipped with a reliable windproof system. The highly flexible frame for these models turns over when hit by stronger gusts of wind before the ribs break or the cover is torn from its

A clean argument:

FARE® products are tested for harmful substances

LABTECH and other renowned and accredited testing institutes test our products according to REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals). Alongside conformity with REACH, the relevant legal directives for harmful substances are considered and implemented for our products.

A fair argument:

FARE® products are produced under humane conditions.

Member of amfori, the leading global business association for open and sustainable trade. We participate in amfori BSCI. For more information visit www.amfori.org

FARE® umbrellas have won several renowned awards.

Red Dot Design Award

. A FARE® product has now been honoured for the thirteenth time by the prestigious 40-member jury of experts at the Red Dot Award: Product Design - most recently in 2021 with the AC golf umbrella FARE®-DoggyBrella (art. 7395).

Promotional Gift Award

. The AC midsize umbrella FARE®-Sound (art. 7799) was selected winner of the 2020 Promotional Gift Award in the premium product category

PSI Sustainability Award

. ÖkoBrella models prevailed in the "Sustainable Product" category in 2017 and 2019 and received awards. In 2021, FARE received the "Innovator of the Year 2021" award in the newly launched PSI Sustainability Awards category. The resource-saving production of the waterSAVE® cover material and the fact that all companies along the value chain from the manufacturer to the end customer - play an exemplary role in sustainability were convincing factors for the jury.

PROMOTIONAL GIFT **AWARD 2020**

A protective cover – for people and the environment

Everybody talks about sustainability and yet for many this is only an abstract concept. Nevertheless, this principle, which originated in forest management, is as simple as it is sensible: Anyone who only cuts down as many trees as can regrow will ensure consistent continuation of the entire forest – and with this – a good, long-term basis of life for future generations.

Action

Product

At FARE we understand sustainability as a combination of social, economic and ecological fields of activity for our company, which are integrated into our core business.

¥ Social

The amfori Business Social Compliance Initiative (amfori BSCI) is a code of conduct based on the international working standards of the ILO (International Labour Organization), which supports globally active companies in building up ethical supply chains and monitors social standards worldwide as well as optimising them continuously.

FARE is a member of amfori BSCI. Our production sites for the manufacture of umbrellas have been audited according to amfori BSCI requirements and all have a valid audit result.

All amfori BSCI participants agree to the Code of Conduct (CoC) and undertake to comply with it. The amfori BSCI Code of Conduct comprises of the following principles as just some examples:

- Appropriate remuneration
- No discrimination
- Safety at work
 No forced labour
- Reasonable working hours
- · No child labour

Member of amfori, the leading global business association for open and sustainable trade. We participate in amfori BSCI. For more information visit www.amfori.org.

Economy

Every year we expand our range of products with new, innovative products. The proportion of sustainable umbrellas will constantly increase, because we want to meet the requirements of our customers and ensure long-term healthy growth for our company,

At FARE, we pay attention to environmentally friendly work processes through measures such as CO₂-neutral parcel shipping, bundling production orders, wording single parcel shipments, reducing paper consumption through the use of digital documents, switching to green gas and green power, etc.

It is important to us to save energy and CO_2 emissions. In cooperation with ClimatePartner, we have recorded and reduced our greenhouse gas emissions and have offset the unavoidable emissions through two different climate protection projects.

FABE has been OKOPROFT-certified since 2021. Within the framework of this project, numerous outstanding environmental protection measures were implemented, which serve to reduce the consumption of resources by raising awareness among employees and by establishing purchasing criteria, to save water and energy, and to promote — mobility,

waterSAVE® – Every drop counts

Water-saving dyed cover material made from recycled plastics.

Progressive thinking is good – but only progressive action makes the difference. As part of our sustainability strategy, we not only rethink existing production processes, but also look at new, progressive strategies.

In our waterSAVE® cover material, which was launched in 2020, we use material made from recycled plastics and employ a revolutionary dyeing process that reduces the consumption of valuable raw materials as well as energy consumption and the impact of harmful substances on the environment.

Short and sweet

The waterSAVE® dyeing process yields numerous benefits in contrast to conventional dyeing processes:

» Reducing CO₂ emissions by more than

60%

» Avoidance of harmful chemicals:

Because of the transparent production process, the use of chemicals can be controlled and the exclusive use of detox-compliant chemicals can be ensured.

> » Reducing sludge production by

ocess, the use of chemicals use of detox-compliant

» Reducing energy consumption by up to

70%

art. 7915, p. 75

» Savings in terms of water consumption of

90%

98%

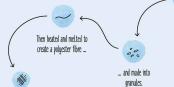

» Efficiency of dye uptake increases up to

98%

And this is how the waterSAVE® dyeing process works:

The yarn made from recycled plastic is already completely dyed in the production process for our waterSAVE® cover material. In this case, no water is required whatsoever. Far fewer chemicals are used and the drying time in energy-consuming machines is a thing of the past. This also completely elliminates the need for energy-intensive cleaning and treatment of the water.

... that can be woven into material to cover our OkoBrella! -

art. 5644, p. 57

Plastic waste is

collected, cleaned _

With the use of our waterSAVE® cover material, we became the first winner of the new "Innovator of the Year" category of the PSI Sustainability Awards in 2021.

waterSAVE® becomes colourful!

While only black umbrellas could be equipped with this sustainable cover in 2021, additional colours and models were added this year. For example, we switched our popular OkoBrella family to waterSAVE® cover material. In addition, we have four models (art. 5460, art. 1112, art. 7810, art. 7860) where the cover is optionally available in waterSAVE® material.

Excitingly designed

An umbrella offers a huge variety of refinement possibilities. On the following four pages we show you the different printing methods and their areas of application with warehouse stock.

Up to 8 fresh colours effectively showcase logos, slogans or witty sayings. The focus is on top quality and long service life.

Transfer printing

This printing process is particularly suitable for photorealistic motifs or motifs with very fine screens or fine gradients.

Special printing process for photorealistic motifs on white covers.

White single print

Coloured screen print without white undercoat

White dual print

Coloured screen print with white undercoat

To obtain a brilliant, radiant white, the printing colour white is printed twice.

White underlay

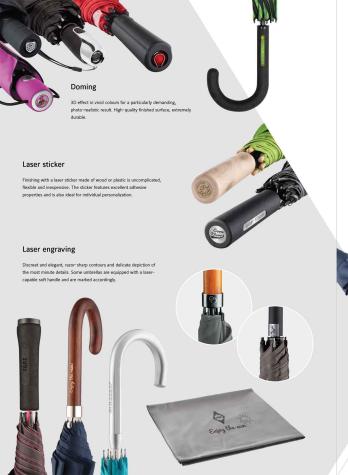

To ensure the optimum realisation of the desired print colours, a white underlay is required on coloured covers. This underlay is slightly smaller than the coloured motif so that there is no flash at the edges.

Silver, black and gold print colours do not require a white underlay. Printing on white covers: in this case, no additional white underlay is necessary.

When dry, Colormagic printing is white; as soon as the surface becomes wet, the white print becomes transparent and the underlying colour is visible.

Finishing of transparent covers/cut-outs

Due to the high-quality polyethylene material, screen printing with up to four colours is possible on our AC regular umbrells FARE*-Pure (art. 2333) and the new AC regular umbrells FARE*-Pure (art. 2333) and the new AC regular umbrells FARE*-View (art. 1119). In the case of Pure models, it should be noted that a maximum of two panels, not positioned next to each other, can be grafted.

Tube printing

The plastic tube of the FARE*-Tube mini umbrella (art. 5792) offers a new and unusual advertising space: It can be printed virtually seamlessly along its entire length. This makes it possible to customise logos and motifs with a high level of brilliance, durability and detail.

Variable filling

With the mini umbrella FARE*-Fillit (art. 5052) your options are only limited by your ideas and the size of the handle! Whether you fill it with small products, a voucher, or have a sweet thank you, we'd be delighted to help!

Individual sound brand

The AC midsize umbrella FARE*-Sound (art. 7799) is simply amazing with its ability to play audio logos, jingles or other beautiful sounds. The standard version is supplied with a clip of the classic song "Singin" in the rain". But it can also be customised with a sound of your choice, which sounds when the umbrella is opened.

Individual design in all-over print

A popular finishing variation is motifs that show a photo-realistic look on the entire cover. In order to better respond to this customer request, we now offer the FARE—Allover Xpress service. Full digital all—over printing of the desired motific can be implemented from an order quantity of just 100 units. Minor matching inaccuracies cannot be avoided, but the overall picture is impressive. Design an individual umbrella easily in four steps:

STEP 1

You have five basic models available – just choose your favourite.

STEP 2

Send us your desired motive as a printable file (min. 90 × 90 cm at 300 dpi).

Other finishing options (at a surcharge)

Delivery times may be longer depending on the option selected.

Doming sticker on the handle (only possible for art. 75002, 75460 and 71144)

Sleeve in digital printing (only possible for art, 75002 and 75460)

STEP 4 Look forward to your costumised umbrella! riginal proof

Single colour screen printing on the panel or closing strap

Interior printing Exterior cover coated in black (light sheen)

- Full digital all-over printing of your chosen motive
- From just 100 units
- Ready for shipment approx.
- 20 days after approval *

Production-related offset between the segments cannot be excluded.

* Available shipping method: Sea freight.

 Available shipping method: Sea freight approx. 50 days, shipping included, or air freight approx. 14 days, shipping subject to surcharge.

Customisations

Individual & versatile

With a little courage and by advance planning, individual customisations can be designed that are completely tailor-made to match the customer's Corporate Identity. It is worth it: Many of these unique designs have now developed into real cult items.

Cover colour

On request, we can also have the cover fabric produced in your own individual colour.

Travelmate Camper (art. 6139) with cover in special colour according to Pantone and 2C screen printing

Cover in special colour with manual offset on one panel, inside coated metallic gold

Cover materials

Our high-quality polyester pongée material can be produced in standard or special colours from recycled plastics. With a particularly water- and energy-saving dyeing process, this becomes our waterSAVE® cover material that can be used in several popular standard colours.

Fibreglass shaft with a diameter

of 14 mm, individually printed with a photo-realistic motif
